

Handbook of Sample Preparation and Handling

SPEX

SPEX Handbook of Sample Preparation and Handling

Ralph H. Obenauf, Ph.D., Editor

Richard Bostwick, Assoc. Editor

TABLE OF CONTENTS

How to Use this Handbook

I. Products and Techniques for Sample-Preparation 1

Pulverizing and Blending

When to Pulverize	3
How to Select a Laboratory Mill	3
Characteristics of Grinding Containers	3
Helpful Hints about Grinding	10
Further Preparation of the Sample	11
Products for Pulverizing and Blending	11

Pressing and Pelletizing

When to Pelletize	49
How to Prepare Pellet Samples	50
Selecting the Pellet Die	51
Reinforcing Pellets with Spex-Caps	54
Choosing a Laboratory Press	55

Fusion

When to Employ Flux Fusion	59
How to Prepare a Fused Sample	59
How to Select a Fusion Flux	59
Products for Fusion	60

II. Products and Techniques for Analytical Spectroscopy 63

X-Ray Fluorescence Spectroscopy (XRF)

Sample Requirements	65
Preparing Powder Samples for XRF	66
Particle Size Effects	67
Reinforcing XRF Pellets with Spec-Caps	68
X-Cells for XRF Liquid Samples	69
Selecting Thin Film Windows for XRF	72

Optical Emission Spectroscopy (OES)

Sample Requirements	81
Arc/Spark Stand and Accessories	82
Master Plates	84
Graphite Electrodes, Rods, Powders and Accessories	85
Kodak Photographic Products	93
Emulsion Properties	96

Fluorescence and Phosphorescence Spectroscopy

Sample Requirements	101
Accessories for Spex Fluorolog Systems	102

Raman Spectroscopy

Sample Requirements	105
Sample Accesories for SPEX Raman Systems	106
How To Order	111
Catalog Number Index	115
Subject Index	119
